**Revision Number:** 2

## 1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND THE COMPANY/UNDERTAKING

<table>
<thead>
<tr>
<th>Product Name: KOCHKLEEN® P-02</th>
</tr>
</thead>
</table>

| Contact Manufacturer: John R. Hess & Co., Inc.  
| 400 Station St.  
| Cranston, RI 02910  
| Technical Information: (401) 785-9300  
| (800) 556-4377 |

**Emergency response telephone number:**

- Chemtrec 1-800-424-9300 (Spill, Leak, Fire, Exposure, Accident)
- +1 (703) 527-3887 (outside USA)

## 2. HAZARDS IDENTIFICATION

### Emergency Overview

Warning. Irritating to eyes. Corrosive to metals (as aqueous solution). Product dust may cause mild, mechanical irritation. May form combustible dust concentrations in air.

<table>
<thead>
<tr>
<th>Appearance</th>
<th>Physical State</th>
<th>Odor</th>
</tr>
</thead>
<tbody>
<tr>
<td>White</td>
<td>Solid: Powder / Granular</td>
<td>Odorless</td>
</tr>
</tbody>
</table>

### Classification according to 29 CFR 1910, amended to conform to the United Nations’ Globally Harmonized System of Classification and Labelling of Chemicals (GHS):

- **Serious Eye Damage / Eye Irritation**: Category 2
- **Hazards Not Otherwise Classified**: Combustible Dust

### GHS Label Elements

- **Signal Word**: Warning
- **GHS Hazard Pictogram(s)**:

  ![Exclamation Mark]

- **Hazard Statement(s)**: H319 Causes serious eye irritation  
  May form combustible dust concentrations in air.

- **Precautionary Statement(s)**: Prevention Precautionary Statement(s): Wash hands and exposed skin thoroughly after handling. Wear eye protection.  
  Response Precautionary Statement(s): If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice.
3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical nature of the preparation    Substance
Chemical Family                      Acids
Molecular Formula                    C₆H₈O₇

The following component(s) in this product are considered hazardous under applicable OSHA (USA), WHMIS (Canada), and/or NOM-002-SCT-2003 (Mexico) regulations

4. FIRST AID MEASURES

Description of first aid measures

General Advice  If symptoms persist, call a physician. Show this safety data sheet to the doctor in attendance. Use personal protective equipment. For personal protection see section 8.

Eye Contact    Immediately flush with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. If symptoms persist, call a physician.

Skin Contact   Wash off immediately with soap and plenty of water removing all contaminated clothes and shoes.

Inhalation     Move to fresh air.

Ingestion      Clean mouth with water and afterwards drink plenty of water.

Protection of First-aiders  Use personal protective equipment. Avoid contact with skin, eyes and clothing.

Most important symptoms and affects, both acute and delayed

Eyes  Irritating to eyes. Contact with eyes may cause mechanical irritation.

Skin  According to GHS hazard classification criteria, the product is not considered as being a skin irritant. Product dust may cause mild, mechanical irritation. Health injuries are not known or expected under normal use.

Inhalation  May cause irritation of respiratory tract. Based on the low pH, citric acid would be expected to cause irritation to the respiratory tract, resulting in a higher cough response as the inhalation exposure concentration was increased.

Ingestion  Oral exposure is not anticipated under normal working conditions. Health injuries are not known or expected under normal use.

Main Symptoms  Itching. Redness. Burning sensation.

Indication of any immediate medical attention and special treatment needed

Notes to Physician  Treat symptomatically.

5. FIRE-FIGHTING MEASURES

Flammable Properties

Fine dust dispersed in air may ignite. Risk of ignition followed by flame propagation or secondary explosions should be prevented by avoiding accumulation of dust, e.g. on floors and ledges.

Extinguishing media

Suitable Extinguishing Media  Dry chemical. Carbon dioxide (CO₂) Water spray. Foam. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Unsuitable Extinguishing Media  No information available.

Special hazards arising from the substance or mixture

Hazardous Combustion Products  Thermal decomposition can lead to release of irritating gases and vapors, Carbon monoxide (CO), Carbon dioxide (CO₂).

Specific Hazards Arising from the Chemical

Sensitivity to mechanical impact  No.

Sensitivity to static discharge  Yes. (as dust).

Further information  Fine dust dispersed in air may ignite. Dust explosibility class = 1. Weak to moderately explosive.
Advice for fire-fighters

Protective Equipment and Precautions for Firefighters As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions
Avoid contact with the skin and the eyes. Use personal protective equipment. For personal protection see section 8. Avoid dust formation.

Environmental Precautions
Prevent further leakage or spillage if safe to do so. Prevent product from entering drains.

Methods for Clean-up
Pick up and transfer to properly labelled containers. Avoid dust formation. Keep in suitable, closed containers for disposal. Aqueous spillage should be neutralized and treated prior to discharge. For disposal information see section 13.

7. HANDLING AND STORAGE

Handling
Wear personal protective equipment. Avoid contact with skin, eyes and clothing. Handle in accordance with good industrial hygiene and safety practice. Do not breathe vapours/dust. Use only in area provided with appropriate exhaust ventilation. Avoid dust formation in confined areas. Fine dust dispersed in air may ignite. Ensure adequate ventilation. Refer to NFPA 61, "Standard for the Prevention of Fires and Dust Explosions in Agricultural and Food Processing Facilities".

Storage

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure Limits
As an airborne dust, exposure limits pertaining to "particulates not otherwise regulated" have been provided below. Specific exposure limits have not been identified for this product. However, as an irritant, it is advisable to limit worker exposure to the greatest extent possible.

<table>
<thead>
<tr>
<th>Chemical Name</th>
<th>ACGIH TLV</th>
<th>OSHA PEL</th>
<th>MEXICO</th>
<th>NIOSH</th>
</tr>
</thead>
<tbody>
<tr>
<td>Particulates not otherwise regulated</td>
<td>TWA: 10 mg/m³  inhalable particles, recommended</td>

<td>not listed</td>
<td>not listed</td>
</tr>
<tr>
<td></td>
<td>TWA: 3 mg/m³  respirable particles, recommended</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Engineering Measures
Local exhaust ventilation. Ensure adequate ventilation, especially in confined areas.

General Hygiene Considerations
When using, do not eat, drink or smoke. Regular cleaning of equipment, work area and clothing.

Personal Protective Equipment

Eye/face Protection. Safety glasses with side-shields. If airborne dust concentrations are excessive, wear goggles.

Skin and Body Protection
Impervious gloves. Long sleeved clothing. Boots.

Respiratory Protection
Respirator with a dust filter. In case of insufficient ventilation wear suitable respiratory equipment.

10. STABILITY AND REACTIVITY

Reactivity  Reactions with metal nitrates may be potentially explosive. Aqueous form is corrosive to copper, zinc, aluminum and their alloys.
Stability   Not applicable. Stable under normal conditions.
Possibility of Hazardous Reactions  None under normal processing.
Conditions to Avoid  Avoid dust formation. Heat, flames and sparks.
Hazardous Decomposition Products  Thermal decomposition can lead to release of irritating gases and vapors Carbon monoxide (CO) Carbon dioxide (CO₂)

11. TOXICOLOGICAL INFORMATION

Information on toxicological effects

<table>
<thead>
<tr>

</tbody>
</table>

Skin corrosion/irritation  Based on available data, not, or only slightly irritating.
Serious eye damage/eye irritation  Irritant, causes serious eye irritation.
Method  OECD Guideline 405 (Acute Eye Irritation / Corrosion)
Species  Rabbit (New Zealand White)
Results
Irritating: Overall irritation score for 10% solution: 9.3 of max. 110 (mean (of 3 animals)) (Time point: at 1, 24, 48 or 72 h) (fully reversible within: 7 days) (score achieved at 1 h)
Overall irritation score for 30% solution: 16 of max. 110 (mean (of 3 animals)) (Time point: at 1, 24, 48 or 72 h) (not fully reversible within: 14 days) (fully reversible in 14-21 days) (expert opinion) (score achieved at 1 h)

Respiratory or skin sensitisation
Based on available data, not expected to be a skin or respiratory sensitiser.

Germ cell mutagenicity
Based on available data, negative to test/non-mutagenic.

Carcinogenicity
Based on available data, no evidence of carcinogenicity.

Reproductive toxicity
Based on available data, no evidence of reproductive toxicity.

STOT - single exposure
No evidence of toxicity.

STOT - repeated exposure
Based on available data, no toxicity identified at highest exposure levels [NOAEL(rats) 4000mg/kg bw/d].

Aspiration hazard
Based on available data, no known aspiration hazard.

Potential health effects

Eyes
Irritating to eyes. Contact with eyes may cause mechanical irritation.

Skin
According to GHS hazard classification criteria, the product is not considered as being a skin irritant. Product dust may cause mild, mechanical irritation. Health injuries are not known or expected under normal use.

Inhalation
May cause irritation of respiratory tract. Based on the low pH, citric acid would be expected to cause irritation to the respiratory tract, resulting in a higher cough response as the inhalation exposure concentration was increased.

Ingestion
Oral exposure is not anticipated under normal working conditions. Health injuries are not known or expected under normal use.

Main Symptoms

12. ECOLOGICAL INFORMATION

Ecotoxicity
Not classified for aquatic toxicity. Contains no substances known to be hazardous to the environment. Contains no substances known to be not degradable in waste water treatment plants.

<table>

</table>

Persistence/Degradability
Readily biodegradable. Inherently biodegradable. 97% and 100% biodegradability in 28d and 19d, respectively (protocols OECD 301E and OECD 301A, respectively).

Mobility
Soluble in water.

PBT and vPvB assessment
This substance is not considered to be persistent, bioaccumulating nor toxic (PBT).

13. DISPOSAL CONSIDERATIONS

Whenever possible, as rules and regulations allow, please recycle or manage materials to minimize waste.

Waste Disposal Methods
Dispose of in compliance with the laws and regulations pertaining to this product in your jurisdiction. Rinsewater resulting from cleanup should be collected for treatment before disposal. Solutions with low pH-value should be neutralized before discharge.

Contaminated Packaging
Empty containers should be decontaminated and taken for local recycling, recovery or waste disposal.
